

Barges range

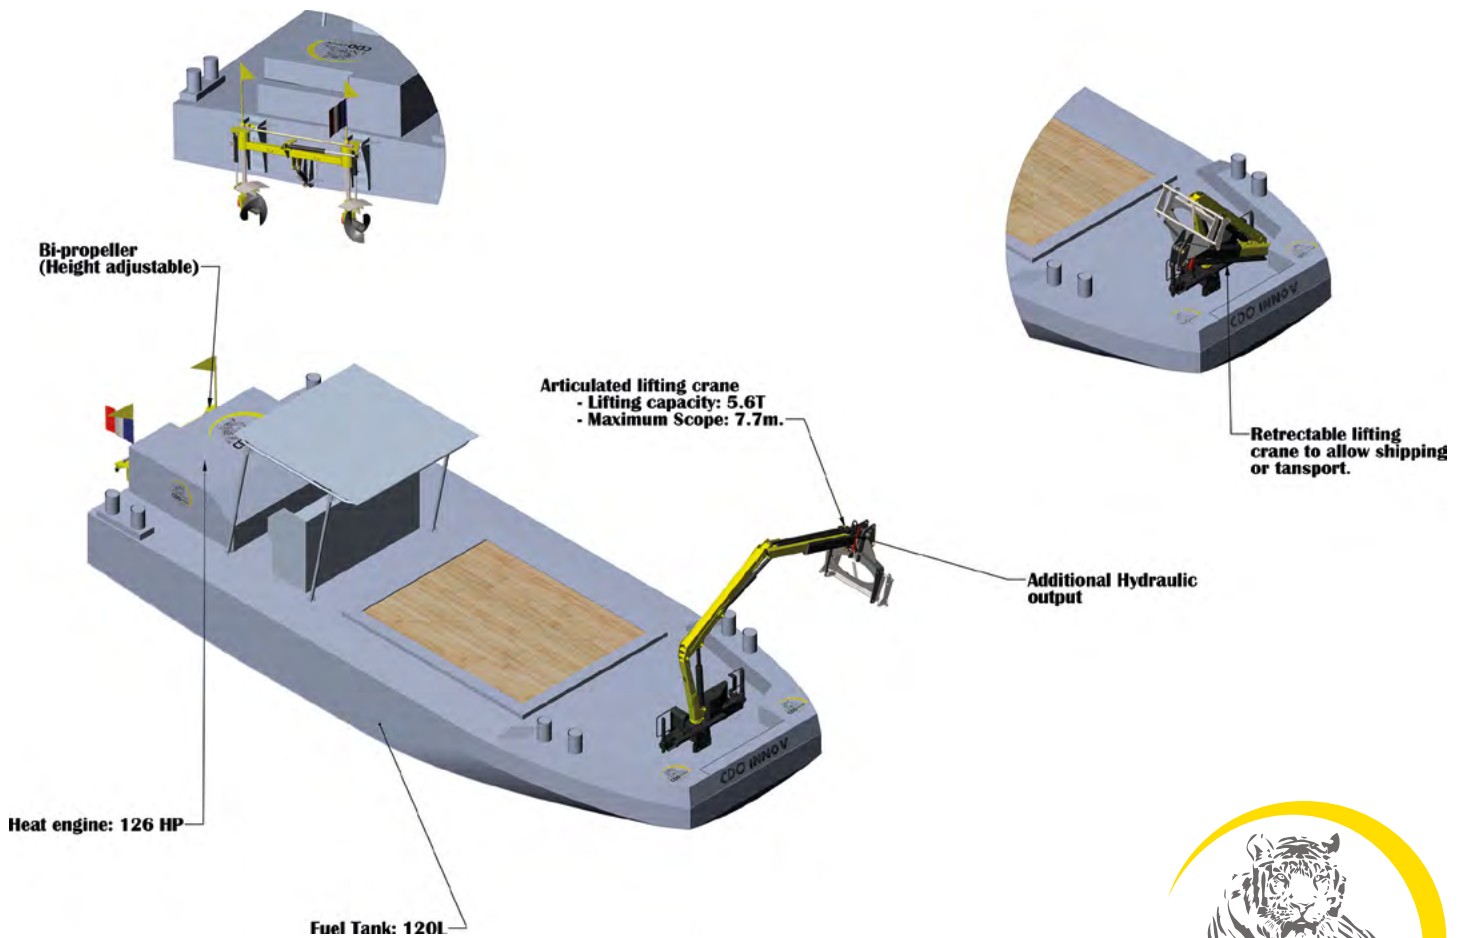

FRANCE

Barges are operating, storage or pontoon barges specialized for the river, harbor and maritime domains. All of our barges are made from quality raw material and components, in our Machecoul factory, south of Nantes (France). CDO Innov barges are CE certified and were also conceived to be certified according to the DDTM (inland waters) and/or CSN (maritime area) norms.

Areas of application:

Operating in low lift zones - Transport of persons -
Sludge/sand/sediments/algae pumping - Waterweed cutting -
Grubbing up - Beach cleaning.

Patented

Barges range

Advantages

- High versatility and adaptation capacity in function of the environment
